

Instructions for Authors

Scope

Clinical and Applied Thrombosis/Hemostasis is dedicated to serving as a reporting forum for studies regarding the etiology, pathophysiology, clinical diagnosis, laboratory diagnosis, and treatment of thrombohemorrhagic disorders. Articles dealing with new diagnostic procedures are encouraged, provided they are clinically oriented or potentially applicable to clinical and laboratory medicine. Articles dealing with all aspects of thrombosis, hemostasis, and thrombolysis of clinical or clinical laboratory applicability are also encouraged. The contents of the journal are of appeal to any person interested in clinical and applied thrombohemorrhagic disorders.

Publication Policy

Each issue contains a combination of original research reports, review articles, letters to the editor, and invited editorials. Original research reports and review articles will be peer reviewed by at least two members of the editorial board or outside consultants and should not exceed 30 double-spaced typed pages.

Manuscript Submission

All manuscript submissions should be sent to the attention of Sheila Platt at the offices of Westminster Publications VIA E-MAIL ONLY to: Sheila@westminsterpublications.com.

Preparation of Manuscript

General format: Double space all copy including legends, footnotes, tables and references. Submit electronic files in a standard word processing format (Microsoft Word is preferred). Do not submit ASCII text files. Do not use automatic numbering or footnotes for references. The e-mail transmission should include one file for the text of the paper, and separate files for each figure.

Title page: Include on the title page (a) complete manuscript title; (b) authors' full names, highest academic degrees, and affiliations; (c) name and address for correspondence, including fax number, telephone number, and e-mail address; (d) address for reprints if different from that of corresponding author; and (e) sources of support that require acknowledgment, and a short title of no more than 45 characters (including spaces) for use as a running head.

Unstructured abstract and key words: Limit the summary to 250 words. It must be factual and comprehensive. Limit the use of abbreviations and acronyms, and avoid general statements (eg, "the significance of the results is discussed"). List three to five key words or phrases.

Text: Organize the manuscript into journal-specific main headings. Define abbreviations at first mention in text and in each table and figure. If a brand name is cited, supply the manufacturer's name and address (city and state/country). Acknowledge all forms of support, including pharmaceutical and industry support, in an Acknowledgments paragraph.

Abbreviations: For a list of standard abbreviations, consult the *Council of Biology Editors Style Guide* (available from the Council of Science Editors, 9650 Rockville Pike, Bethesda, MD 20814) or other standard sources. Write out the full term for each abbreviation at its first use unless it is a standard unit of measure.

References: The authors are responsible for the accuracy of the references. Key the references (double-spaced) at the end of the manuscript. Cite the references in text in the order of appearance. Cite unpublished data, such as papers submitted but not yet accepted for publication or personal communications, in parentheses in the text. If there are more than three authors, name only the first three authors and then use et al. Refer to the *List of Journals Indexed in Index Medicus* for abbreviations of journal names, or access the list at <http://www.nlm.nih.gov/tsd/serials/lji.html>. Sample references are given below:

Figures: Cite figures consecutively in the text, and number them in the order in which they are discussed. If it is necessary to submit hard copies of figures, submit all artwork in camera-ready form; illustrations should be glossy prints or high-quality, laser-printed illustrations. Photocopies are unacceptable. Lettering should be large enough that it will remain legible after figure reduction; typewritten or unprofessional lettering is unacceptable. Figure parts (A, B, C) may be left unlabeled (but clearly marked on back) for professional placement by the journal's printer.

Figure legends: Legends must be submitted for all figures. They should be brief and specific, and they should appear on a separate manuscript page after the references. Use scale

markers in the image for electron micrographs, and indicate the type of stain used.

Color figures: The journal accepts for publication color figures that will enhance an article. Authors who submit color figures will receive an estimate of the cost for color reproduction. If they decide not to pay for color reproduction, they can request that the figures be converted to black and white at no charge.

Digital figures: Electronic figures should be submitted as TIFF or JPEG. Preferred formats are Adobe Photoshop and Adobe Illustrator. Do not submit Powerpoint figures. Figure files should be submitted as separate files and are not to be embedded within the text file.

Tables: Cite tables consecutively in the text and number them in that order. Key each on a separate sheet, and include the table title, appropriate column heads, and explanatory legends (including definitions of any abbreviations used). Do not embed tables within the body of the manuscript. They should be self-explanatory and should supplement, rather than duplicate, the material in the text.

Patient anonymity and informed consent: It is the author's responsibility to ensure that a patient's anonymity be carefully protected and to verify that any experimental investigation with human subjects reported in the manuscript was performed with informed consent and following all the guidelines for experimental investigation with human subjects required by the institution(s) with which all the authors are affiliated. Authors should mask patients' eyes and remove patients' names from figures unless they obtain written consent from the patients and submit written consent with the manuscript.

Permissions: Authors must submit written permission from the copyright owner (usually the publisher) to use direct quotations, tables, or illustrations that have appeared in copyrighted form elsewhere, along with complete details about the source.

Style: Pattern manuscript style after the *American Medical Association Manual of Style* (9th edition). *Stedman's Medical Dictionary* (27th edition) and *Merriam Webster's Collegiate Dictionary* (10th edition) should be used as standard references. Refer to drugs and therapeutic agents by their accepted generic or chemical names, and do not abbreviate them. Use code numbers only when a generic name is not yet available. In that case, supply the chemical name and a figure giving the chemical structure of the drug. Capitalize the trade names of drugs and place them in parentheses after the generic names. To comply with trademark law, include the name and location (city and state in USA; city and country outside USA) of the manufacturer of any drug, supply, or equipment mentioned in the manuscript. Use the metric system to express units of measure and degrees Celsius to express temperatures, and use SI units rather than conventional units.

After Acceptance

Copyright: All authors must sign a copy of the Journal's "Author's Acceptance Form." Send the signed form to Journal Production Editor, *Clinical and Applied Thrombosis/Hemostasis*, Westminster Publications, Inc, 708 Glen Cove Avenue, Glen Head, NY 11545.

Page proofs and corrections: Corresponding authors will receive page proofs to check the copyedited and typeset article before publication. It is the author's responsibility to ensure that there are no errors in the proofs. Changes that have been made to make the article conform to journal style should be allowed to stand if they do not alter the authors' meaning. Authors may be charged for alterations to the proofs beyond those required to correct errors or to answer queries. Proofs must be checked carefully and returned within 24 to 48 hours of receipt, as requested in the cover letter accompanying the page proofs.

Reprints: Authors will receive a reprint order form with the page proofs that includes reprint costs. Reprint requests should be returned with the corrected proofs, if possible. Reprints are normally shipped 6 to 8 weeks after publication of the issue in which the item appears. Contact the Reprint Department, Westminster Publications, Inc, 708 Glen Cove Avenue, Glen Head, NY 11545, with any questions.

Publisher's contact: Send corrected page proofs, reprint order forms, color proofs, and any other related materials to Publications Manager, *Clinical and Applied Thrombosis/Hemostasis*, Westminster Publications, Inc, 708 Glen Cove Avenue, Glen Head, NY 11545; Telephone: (516) 759-0025.

Checklist

- Text file
- Separate files for each figure
- Cover letter
- Title page
- Abstract
- References double-spaced in AMA style
- Corresponding author designated (in cover letter and on title page)
- Permission to reproduce copyrighted materials or signed patient consent forms
- Acknowledgments listed for grants and technical support
